Here is the complete Master Asset Generation Guide & Prompt Manifest tailored specifically for ChatGPT Image 2.5 and Grok Imagine (or Gemini Imagen 3).
You can copy and paste the sections directly into the other LLMs.

🎮 Master Asset Generation Guide & Technical Manifest

Target Project: `Gauntlet Godot`
Engine: Godot Engine 4.7.2 (GL Compatibility Mode)
Style: 1990s Dark Fantasy Arcade Souls-like FPS (*Gauntlet Legends* meets *DOOM*, *Hexen*, and *Dark Souls*)
Platform: PC with native DualShock 4 / PS4 Controller mapping

---

📌 Engine Architecture & Sprite Limitations (For Context)

Why Previous Sprites Failed:

1. Floating / Floor Clipping: Generated frames had inconsistent feet baselines or fluctuating character heights, causing characters to sink through the floor or float when walking.
2. Baked Floor Shadows & Gradients: AI models often generate ambient floor shadows or subtle background vignettes. In Godot, these shadows get cut out as ugly dark blotches or cause alpha halos.
3. Non-Uniform Frame Grids: When frame cell sizes vary even by a few pixels, slicing them causes the character to jitter violently between animation steps.

The Strict Technical Rules for These Generations:

- Pure Chroma Key Green (`#00FF00`): Solid flat RGB `(0, 255, 0)` with NO shadows, NO gradients, NO floor lines.
- Weapons (First-Person Viewmodels): Drawn strictly from the player's perspective looking forward from the bottom of the screen (DOOM/Hexen style) in a single horizontal 4-frame strip.
- Characters (Billboard Sprites): Drawn in 3/4 orthographic perspective on an exact 6x6 uniform square grid (36 frames total) with a locked, identical ground baseline across every single frame.

📋 Step 1: Priming Prompt (Send This to ChatGPT / Grok First)

Copy and paste this into ChatGPT or Grok before requesting any assets so it understands its persona and constraints:
text

```
You are a master 1990s retro dark fantasy video game sprite artist specializing in arcade and PC classics (DOOM 1993, Hexen: Beyond Heretic, Blood, and Capcom's Dungeons & Dragons: Shadow over Mystara).
```

```
I am building a Souls-like first-person hack-and-slash in Godot Engine 4.7.
Whenever I ask you to generate an asset, you MUST follow these four non-negotiable
rules:
1. BACKGROUND: Pure, flat, unshaded solid green screen (#00FF00). Absolutely NO floor
shadows, NO cast shadows, NO ambient occlusion, NO gradients, and NO background
scenery.
2. ALIGNMENT & SCALE: For sprite sheets, every frame in the grid must share the exact
same character proportions, scale, and ground baseline height so animations do not
jitter or float.
3. PERSPECTIVE: Weapons must be drawn strictly from first-person view (hands at the
bottom edge of the screen). Characters must be drawn in 3/4 orthographic perspective
(no 3D floor vanishing perspective).
4. ART STYLE: Gritty 32-bit dark fantasy pixel art with bold black outlines, rich
hand-shaded palettes, weathered metal, and sharp silhouettes. No soft AI airbrushing,
no 3D plastic look.
```

⚔️ Category A: First-Person 2D Weapon Viewmodels (DOOM / Hexen Style)

Format: 4-frame horizontal animation strip on flat `#00FF00` green background.

1. Iron Broadsword (Warrior Primary Melee)

- Description: Weathered double-edged knightly broadsword held two-handed in right-leaning guard.
- Copy-Paste Prompt:

text

```
Pixel art first-person weapon animation sprite sheet, 4 horizontal frames in a clean
sequence, retro 1990s dark fantasy FPS game like Hexen and DOOM. The weapon is a
gritty Iron Broadsword seen from the player's first-person hands perspective at the
bottom-right of the screen.
- Frame 1: Idle ready stance, sword blade angled upward pointing slightly toward
center screen.
- Frame 2: Heavy windup, sword pulled back to the right side with tensed armored
gauntlets.
- Frame 3: Dynamic horizontal slash arc sweeping across the screen from right to left
with a glowing sharp white-steel motion blur trail.
- Frame 4: Recovery, sword returning cleanly to ready stance.
Authentic 32-bit pixel art style, heavy black outlines, weathered cold steel blade
with runic fuller, leather-wrapped grip. Pure flat solid green background (#00FF00),
completely uniform, zero shadows, no floor.
```

2. Tower Shield (Warrior Secondary Block / Bash)

- Description: Heavy iron-rimmed heater shield held in the left hand.
- Copy-Paste Prompt:

text

```
Pixel art first-person weapon sprite sheet, 3 horizontal frames, 1990s retro dark fantasy FPS style. A heavy iron Tower Shield held in the player's left hand seen from first-person view.
- Frame 1: Low-guard ready stance, resting in the lower-left corner of the screen.
- Frame 2: High defensive guard, shield snapping up to cover the center of the screen, showing battle-scarred dark iron plate and golden griffin crest.
- Frame 3: Heavy shield bash / block reaction, shield shuddering forward with bright orange deflection sparks bouncing off the iron boss.
Detailed 32-bit pixel art, gritty metal highlights, bold outlines. Pure flat solid green background (#00FF00), zero cast shadows, no floor, no background gradients.
```

3. Elven Recurve Longbow (Elf Primary Ranged)

- Description: Carved yew-and-silver composite bow with broadhead hunting arrows.
- Copy-Paste Prompt:

text

```
Pixel art first-person weapon animation sprite sheet, 4 horizontal frames, retro 1990s dark fantasy FPS like Heretic. An Elven Recurve Longbow seen from the player's first-person hands perspective.
- Frame 1: Idle rest, bow held vertically on the left with a green-fletched broadhead arrow nocked.
- Frame 2: Full draw, right hand pulling the bowstring back close to the camera, limbs bending under tension.
- Frame 3: Arrow release, bowstring vibrating forward with a swift kinetic blur line as the arrow flies toward center reticle.
- Frame 4: Quick re-nock, drawing a fresh arrow from quiver back onto the riser.
Crisp 32-bit pixel art, elegant elven silver filigree on dark polished yew wood, clean edges. Pure flat solid green background (#00FF00), no ground shadows, no gradients.
```

4. Arcane Wizard Staff (Wizard Primary Magic)

- Description: Gnarled ash-wood staff topped with three bronze talons holding a swirling violet spell crystal.
- Copy-Paste Prompt:

text

```
Pixel art first-person weapon animation sprite sheet, 4 horizontal frames, retro 1990s magical FPS style like Hexen. An Arcane Wizard Staff held in the player's right hand seen from first-person view.
- Frame 1: Idle ready, staff held angled with a pulsing violet elemental crystal orb hovering between three bronze talons.
- Frame 2: Spell charge, magical runes along the wooden shaft illuminate bright cyan and violet sparks crackle around the crystal.
- Frame 3: Casting thrust, staff jabbing forward, releasing a blazing magical fireball projectile and lens flare shockwave toward center screen.
- Frame 4: Recovery, crystal dimming slightly as wisps of magical smoke rise from the tip.
```

```
Authentic 32-bit pixel art, vibrant magical emissive glow with dark gothic wood, sharp outlines. Pure flat solid green background (#00FF00), no floor shadows, no gradients.
```

5. Celestial Spear (Valkyrie Primary Piercing Melee)

- Description: Gilded winged spear with broad leaf-shaped steel head.
- Copy-Paste Prompt:

text

```
Pixel art first-person weapon animation sprite sheet, 4 horizontal frames, retro 1990s FPS style. A divine Valkyrie Celestial Spear held two-handed in first-person perspective.
- Frame 1: Ready stance, spear held low on right flank pointing forward into the distance.
- Frame 2: Windup pull-back, arm drawn back to coil for a powerful strike.
- Frame 3: Deep piercing thrust, spearhead driving straight forward through the center reticle with a sharp white kinetic stab trail.
- Frame 4: Retraction, drawing the spearhead cleanly back to ready stance.
Classic arcade pixel art, golden Nordic wing ornamentation, polished steel. Pure flat solid green background (#00FF00), no shadows, no background scenery.
```

👹 Category B: 3D Billboard Character Sprite Sheets (6x6 Uniform Grid)

Format: 6 rows by 6 columns (36 total frames in a square grid) on flat `#00FF00` green background.

```
Row 0: 6 frames Idle breathing
Row 1: 6 frames Running / Walk cycle
Row 2: 6 frames Telegraph windup (warning attack pose)
Row 3: 6 frames Attack swing / strike
Row 4: 6 frames Stagger / hit flinch
Row 5: 6 frames Death collapse (falling to the ground)
```

6. Minotaur Stalker (The Labyrinth Nemesis)

- Description: The unkillable 9-foot mythological monster that hunts you Alien: Isolation style. Broken iron shackles, brass septum ring, massive notched double-bladed war axe, burning red demonic eyes.
- Copy-Paste Prompt:

text

```
Full character sprite sheet, exactly 6 rows by 6 columns (36 total frames arranged in a perfect uniform square grid). Retro 1990s arcade pixel art style like Capcom's Dungeons & Dragons or Gauntlet Legends.
Character: The Minotaur Stalker, a terrifying 9-foot dark fantasy mythological beast. Muscular bull-man with dark brown fur, curved black horns, brass nose ring, broken iron wrist chains, and glowing red eyes, wielding a massive blood-notched double-bladed executioner axe.
- Row 0: 6 frames idle breathing, heavy chest heaving, snorting steam.
- Row 1: 6 frames menacing stalker walk cycle, heavy stomping hooves.
```

```
- Row 2: 6 frames terrifying roar windup, rearing back with raised axe and wide roaring jaws.
- Row 3: 6 frames devastating downward axe cleave and ground slam.
- Row 4: 6 frames stagger flinch, reeling back slightly from an impact.
- Row 5: 6 frames exhausted retreat collapse.
Every single frame must share the exact same character proportions, scale, and ground baseline height across all cells. High contrast 32-bit pixel art with bold outlines. Pure flat solid green background (#00FF00), absolutely no floor shadows, no gradients, no borders.
```

7. Asterion, Guardian of the Labyrinth (Secret Demigod Boss)

- Description: Noble ancient Greek demigod bull warrior in ceremonial bronze armor and golden horn caps, wielding a runic bronze war hammer. Defeating him rewards the *Aegis of the Minotaur*.
- Copy-Paste Prompt:

text

```
Full character sprite sheet, exactly 6 rows by 6 columns (36 total frames in a perfect uniform grid). Retro dark fantasy arcade pixel art, 32-bit aesthetic.
Character: Asterion the Minotaur King, an ancient demigod guardian. Noble regal bull-man warrior wearing ornate ancient Greek bronze chestplate armor engraved with labyrinth patterns, gold rings on horns, wielding a glowing runic bronze war hammer.
- Row 0: 6 frames regal idle breathing stance, hammer resting on shoulder.
- Row 1: 6 frames heavy armored forward advance march cycle.
- Row 2: 6 frames golden telegraph charge, raising hammer high with golden runic aura.
- Row 3: 6 frames explosive hammer smash and radial shockwave cleave.
- Row 4: 6 frames posture-break stagger, knocked back onto one knee.
- Row 5: 6 frames dramatic defeat fall, dropping to both knees and dissolving into divine golden light.
Uniform scale and ground contact height across all 36 frames. Bold black pixel outlines. Pure flat solid green background (#00FF00), zero cast shadows, no floor.
```

8. Skeleton Archer (Dungeon Sniper)

- Description: Undead marksman in dark cowl and ribcage chainmail, wooden shortbow with glowing violet arrows.
- Copy-Paste Prompt:

text

```
Full character sprite sheet, exactly 6 rows by 6 columns (36 frames in a uniform square grid). 16-bit retro pixel art style like Castlevania or Hexen.
Character: Skeleton Archer, ancient undead soldier with cracked bone ribcage, ragged dark hooded cowl, holding a wooden shortbow and quiver of arrows.
- Row 0: 6 frames eerie idle rattle, skull looking around.
- Row 1: 6 frames clattering skeletal walk cycle.
- Row 2: 6 frames bowstring draw and aiming windup, violet glow on arrowhead.
- Row 3: 6 frames arrow release twang and bow recoil.
```

```
- Row 4: 6 frames bone-shattering hit stagger.
- Row 5: 6 frames complete collapse, bones scattering and skull rolling onto floor.
Consistent scale, centered characters, aligned ground baseline on every cell. Pure
flat solid green background (#00FF00), no floor shadows, no scenery.
```

9. Orc Grunt (Dungeon Vanguard)

- Description: Muscular green-skinned orc foot soldier with tusks, spiked iron helmet, rusted cleaver, and studded shield.
- Copy-Paste Prompt:

text

```
Full character sprite sheet, exactly 6 rows by 6 columns (36 frames in a uniform
square grid). 32-bit arcade pixel art style like Golden Axe and Gauntlet Legends.
Character: Orc Grunt, aggressive green-skinned warrior with protruding tusks, spiked
iron helmet, studded leather armor, holding a brutal jagged rusty cleaver and
iron-rimmed shield.
- Row 0: 6 frames menacing idle stance, breathing and baring tusks.
- Row 1: 6 frames heavy forward charge run cycle.
- Row 2: 6 frames overhead cleaver raise windup with red eyes.
- Row 3: 6 frames vicious downward cleaver slash and shield bash.
- Row 4: 6 frames heavy stagger back from impact.
- Row 5: 6 frames dead collapse, dropping cleaver and falling flat.
Consistent frame sizing, identical baseline ground alignment in all 36 frames. Pure
flat solid green background (#00FF00), zero ground shadows, no background.
```

10. The 4 Hero Classes (Player Selection & 3rd-Person Sprites)

- Warrior (Thor):

text

```
Full character sprite sheet, 6 rows by 6 columns (36 frames uniform grid). 32-bit
arcade pixel art style. Dark fantasy Barbarian Warrior hero with winged steel helmet,
chainmail hauberk, red fur cape, wielding broadsword and round shield. Row 0: Idle
breathing. Row 1: Heavy run cycle. Row 2: Heavy windup. Row 3: Sword slash. Row 4:
Stagger flinch. Row 5: Death collapse. Pure flat solid green background (#00FF00),
consistent scale, locked ground baseline, no shadows.
```

- Elf (Questor):

text

```
Full character sprite sheet, 6 rows by 6 columns (36 frames uniform grid). 32-bit
arcade pixel art style. Elven Ranger hero with forest green tunic, leather bracers,
blonde hair, wielding recurve longbow and quiver. Row 0: Idle rest. Row 1: Agile run
cycle. Row 2: Bow aim windup. Row 3: Arrow release shot. Row 4: Dodge stagger. Row 5:
Death collapse. Pure flat solid green background (#00FF00), consistent scale, locked
ground baseline, no shadows.
```

- Wizard (Merlin):

text

```
Full character sprite sheet, 6 rows by 6 columns (36 frames uniform grid). 32-bit arcade pixel art style. Arcane Wizard hero with midnight-blue hooded robes, gold trim, long silver beard, wielding runic crystal staff. Row 0: Idle floating staff. Row 1: Hover glide walk. Row 2: Spell charge aura. Row 3: Fireball staff cast. Row 4: Barrier stagger. Row 5: Robe collapse death. Pure flat solid green background (#00FF00), consistent scale, locked ground baseline, no shadows.
```

- Valkyrie (Thyra):

text

```
Full character sprite sheet, 6 rows by 6 columns (36 frames uniform grid). 32-bit arcade pixel art style. Valkyrie Shieldmaiden hero with golden winged tiara, silver plate armor, long spear and golden round shield. Row 0: Idle ready. Row 1: Shield-forward run. Row 2: Spear thrust coil. Row 3: Long spear lunge. Row 4: Shield block stagger. Row 5: Valhalla fall death. Pure flat solid green background (#00FF00), consistent scale, locked ground baseline, no shadows.
```

📂 Step 2: Where to Save Your Generated Images

When ChatGPT or Grok generates the PNGs, save them directly to:

- Weapons (broadsword, shield, bow, staff, spear):
  📁 `c:\Users\pdard\OneDrive\Desktop\voxel games\gauntlet legends\Gauntlet Godot\assets\weapons\`
  (Suggested filenames: `broadsword_strip.png`, `shield_strip.png`, `bow_strip.png`, `staff_strip.png`, `spear_strip.png`)
- Characters (minotaur, asterion, skeleton, orc, heroes):
  📁 `c:\Users\pdard\OneDrive\Desktop\voxel games\gauntlet legends\Gauntlet Godot\assets\sprites\`
  (Suggested filenames: `minotaur_sheet.png`, `asterion_sheet.png`, `skeleton_archer_sheet.png`, `orc_sheet.png`)

Whenever you drop one or more files in, just let me know! I will run the automated chromakey stripper to turn them into crystal-clear 32-bit transparent frames and wire them into Godot's viewmodel and enemy controllers immediately.
